Fresenius Kabi Contract Pharmacy Policy

November 2nd, 2026

Dear Covered Entity Customer,

To help maintain integrity and increase transparency in the 340B drug pricing program, effective **January 1, 2027**, Fresenius Kabi, USA LLC, on behalf of itself and its affiliate, Fresenius Kabi, LLC, ("Fresenius Kabi") is implementing a 340B Contract Pharmacy Policy for the products listed in Exhibit A:

- Fresenius Kabi will continue to ship products purchased at the 340B price to locations registered in the Office of Pharmacy Affairs Information System (OPAIS) database as either the 340B covered entity and/or its ship to locations.

- If a covered entity does not have an in-house pharmacy, the covered entity may designate one contract pharmacy for products that must be registered in the OPAIS database as a contract pharmacy to that covered entity.

The covered entity must submit specified claims/encounter-level data elements (CLDE) within forty-five (45) days of the date of service for all 340B dispenses of affected Fresenius Kabi products. The required data elements are detailed in Exhibit B of this policy document.

All contract pharmacy designations and data submissions will be managed in the Truzo® by Kalderos platform. Starting **November 2nd, 2026**, covered entities can go to GoTruzo.com to register and complete the requirements outlined in this policy. Additional details, including instructions for onboarding and use of the Truzo® platform will be shared by Kalderos.

Frequently Asked Questions (FAQs)

1. ***Which products are subject to Fresenius Kabi's Policy?***

   This policy applies to all product NDCs listed in **Exhibit A.**

2. ***How often can I update my contract pharmacy designation?***

   Unless there is a material change to the eligibility status of a designated contract pharmacy, covered entities will be permitted to update their contract pharmacy designation annually, based on the initial date of designation.

   In the event something changes with the eligibility of a designated contract pharmacy, please contact Kalderos' Covered Entity concierge team for assistance.

3. ***Does* Fresenius Kabi *require designated contract pharmacies to have a HIN assigned?***

   Yes. A contract pharmacy must have a HIN for a 340B covered entity to designate it as its single contract pharmacy location.

4. ***If the contract pharmacy my covered entity wants to designate does not have a HIN, how does my entity get one?***

   If you need guidance or more information on how to get a HIN assigned to the contract pharmacy your entity would like to designate, please reach out to your wholesale distributor.

5. ***My covered entity has a contract pharmacy relationship with a pharmacy that is owned by our health system. Is this pharmacy subject to Fresenius Kabi's policy?***

   If the covered entity does not have an in-house pharmacy, the covered entity may designate a single contract pharmacy, regardless of ownership. If the covered entity has an in-house pharmacy but is incapable of dispensing listed products, it may designate a single contract pharmacy through the exemption process in Truzo.

6. ***How long does it take for my covered entity's designation of its single contract pharmacy location to take effect after?***

   Any designation made prior to **January 1st, 2027** will be reflected in eligibility data starting **January 1st, 2027**. After **January 1st, 2027**, it may take up to 10 business days following designation for wholesalers to update their eligibility data.

7. ***Can a child site designate a single contract pharmacy?***

No. All child sites must utilize the parent site's contract pharmacy.

8. ***When should I start submitting claims?***

   Covered entities are required to submit claims as of the effective date of the policy, which is **January 1st, 2027**. However, covered entities can begin testing operations and submitting CLDE immediately after onboarding and designating their contract pharmacy in Truzo®.

9. ***What kind of CLDE will I need to submit?***

   The scope of this policy encompasses CLDE for all 340B dispenses of Product. This includes dispenses processed through a medical or pharmacy benefit (claims), as well as any dispenses processed as cash, patient assistance programs, or charity care (encounters).

10. ***How often will I need to submit claims?***

    You can submit your claims at a cadence that works for you, so long as it is within 45 days of the date of service. To minimize the effort required to assemble the submission, we have found that most covered entities prefer to submit claims at least twice a month.

11. ***Will I be charged any fees for using Truzo®?***

    No. There are no fees associated with your covered entity's use of Truzo®.
